

Resistance. The First Privacy-Focused Decentralized Exchange & Blockchain

Winner of best ICO at the 2019 World Economic Forum in Davos, Resistance is a decentralized exchange, ResDEX, driven and supported by its privacy-oriented blockchain, which uses the Resistance privacy coin, RES, as an intermediary to facilitate private trading.

ResDEX: Easy-to-Use, Private, & Secure

Users can trade almost any cryptocurrency privately, securely, and directly through a user-friendly, security-focused dashboard.

Tor Support:

Users have the option to route transactions and trades through Tor

User Control:

Users always retain control of their funds without the intervention of a middleman

Privacy Features:

Users may harness the power of RES as an intermediary to achieve entirely private trades

Limitless Trading:

There is no registration process and users can trade as much as they want with no withdrawal limits

Instant Swaps:

Atomic swaps allow users to trade up to 95% of existing cryptocurrencies directly with one another

Exchange Fees:

A 0.15% fee is paid by the taker and used to fund the platform, market making, and other privacy projects

RESISTANCE BLOCKCHAIN: SHIELDED TRANSACTIONS MADE SIMPLE

The Resistance blockchain supports enhanced privacy, and security on ResDEX using zk-SNARKs, a form of zero-knowledge proof, to facilitate private transactions.

Private Transactions:

zk-SNARKs allow users to make private transactions if they choose to do so

Fast and Fluid:

Resistance is around four times faster than Zcash so users wait for shorter intervals for transactions to complete

Democratic Mining:

Our CPU-optimized hashing algorithm makes it possible to mine with a regular desktop or laptop computer

Reward Splitting:

With Resistance, miners claim a percentage of the block reward. the rest is split over three other areas

Proof of Work:

30% of the block reward is allocated to miners for securing the Resistance blockchain

Masternodes:

30% of the block reward is given to masternodes for the role they play in facilitating the smooth running of the network.

Proof of Research:

30% of the block reward goes to users who donate computing power to scientific research projects

Project Development:

10% of the block reward is funneled back into developing the Resistance platform

THE BENEFITS OF RESDEX	Resistance Decentralized Exchange	Centralized Exchange	Proxy Token DEX
Exchange	ResDEX	Binance, Bitrex	Bitshares, Waves
Privacy Features	✓	—	—
